MULTI-TOOLS

A solution in your pocket: that's what SOG's line of award-winning multi-tools are designed to provide. Solutions for the myriad of things that can happen while on deployment or on patrol. Solutions for unexpected challenges at a backcountry campsite. Solutions to the small daily problems that crop up at the most inopportune times: a loose screw, an unopened bottle or packing tape in need of cutting.

For more than 30 years, SOG has made multi-tools capable of carrying out any sized mission. Incorporating unrivaled technologies like Compound Leverage that deliver smooth one-handed opening and superior gripping power, SOG's multi-tools have consistently helped people solve problems.

SOG's line of multi-tools are designed in Seattle and guaranteed for life.

DAILY

FLASH MT

MULTI-TOOL

A street-smart multi-tool that boasts everyday capabilities in a compact package.

For those who value daily readiness, the versatile Flash MT provides an understated and highly functional solution. Its unique stainless-steel housing holds seven tools, and the plier head uses SOG's trademark Compound Leverage. SOG's team heaped special attention on the assisted opening CRYO D2 steel blade, making it more practical than most multi-tool knives. It's a modern styled multi-tool that's a breeze to carry and use all day, every day.

POWERACCESS

MULTI-TOOL

Pocketable, streamlined, and comfortable: the PowerAccess is the ultimate EDC multi-tool. Equipped with our patented gear-driven Compound Leverage mechanism, the PowerAccess doubles the torque at plier jaws maintaining grip and reducing chances of slipping off nuts and bolts. The outward-opening components are easily accessible with the multi-tool closed and will lock securely open. When closed, the PowerAccess has a centered, magnetic hex bit driver that can utilize any widely available quarter inch hex bit.

POWERLOCK

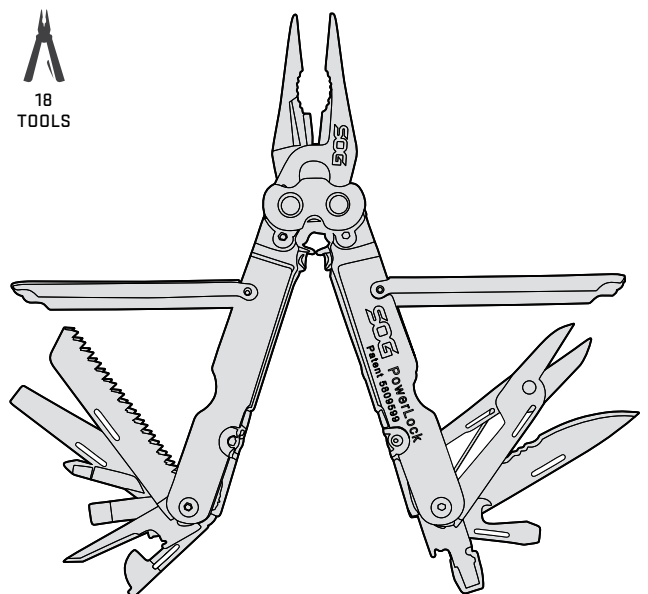

MULTI-TOOL

Using the proven PowerLock chassis, SOG is the only company to apply Compound Leverage technology to EOD (Explosive Ordnance Disposal). This makes it a breeze to crimp blasting caps and demolition cord with less hand pressure. Another unique SOG feature is the positioning of the crimper device within the confines of the handle...not in the plier jaw, like all other designs. This serves to minimize collateral damage to the crimper and allows the operator to have full use of the uninterrupted plier surface. Additionally, there is no weakening of the pliers that often causes breakage of the plier tips. The crimper produces non-flaring, high pull out strength crimps that meet government fuse well specifications. Also includes hard wire cutter. All GSA approved.

TELLUS FLK

FRAME LOCK FOLDING KNIFE

Tellus FLK is a rugged folding knife, that's a brawny solution for down-and-dirty jobs for when you're off the beaten path.

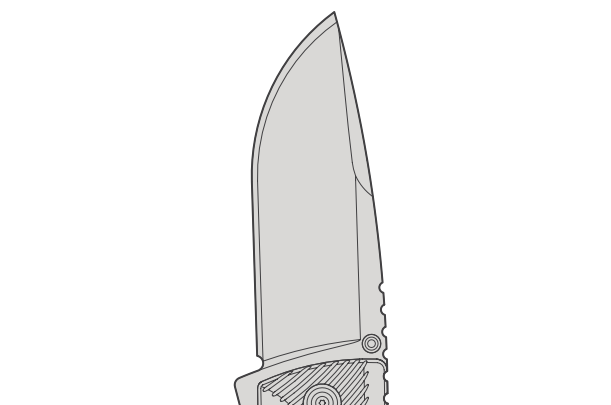

A trusted companion in the forests or the fields, Tellus FLK is a dependable, full-sized frame lock folder that comes up big when you need it most. It's thick blade and easy gripping handle combine to make it an exceptionally durable bushcrafting knife. It's easy to open with the kicker or the thumb-stud, and purposefully designed to operate in the dirt, mud and muck.

A broad-shoulder 3.65" CYR0 440 stainless steel blade provides plenty of backbone to this outdoors workhorse. The GRN handle is easy to manipulate when performing a wide variety of tasks, while SOG's frame lock mechanism has been engineered to mitigate the effects of dirt, mud and other debris that can foul a mechanism.
